PROA CAPITAL considers the principal adverse impacts (PAIs) on the sustainability factors of its investment decisions within the meaning of article 4.1 of the SFDR. These are identified during the due diligence phase and are actively managed throughout the investment period by defining and implementing actions that contribute to their reduction. Their evolution is measured through the annual calculation of 16 indicators set out in the Technical Development (RTS) of the SFDR.

In accordance with the SFDR Regulation, the information will be provided as of June 2023.
